

SafeMail®

New York

detect. **protect.**

SafeMail® New York is a revolutionary mail security services solution that protects businesses from mail terrorism. A single hoax letter can cripple operations for hours, a real attack for days. We protect your employees and ensure your business continues to operate without disruption.

SafeMail® New York screens mail and parcels to detect Chemical, Biological, Radiological, Nuclear and Explosive (CBRNE) threats prior to delivery to your site.

Rapid process, advanced technology

Our trained technicians use X-ray screening and advanced pathogen-detection equipment in a clean room environment. Depending on client requirements, complete CBRNE screening can take less than 90 minutes and delivered to you the same day.

SafeMail® New York customizes our mail security services to meet client requirements. Our experts will work with you to develop a program that considers threat levels, open or closed screening options and delivery time requirements.

SafeMail® New York is a direct response to mail security warnings regarding the potential for mail terrorism. Strategically located just outside New York City, *SafeMail® New York* offers the New York Metro Region a state-of-the-art, 75,000 square foot mail screening facility.

“We protect your employees and ensure your business continues to operate without disruption.”
