## High quality at low cost

The Millennium Group is a business partner for companies seeking to reduce cost while increasing quality. As North America's leading print management service, we excel at evaluating and pro-actively managing our clients' print and copy operations with leading technology, efficient equipment, and highly-skilled professionals. Unlike most print management vendors, The Millennium Group isn't a retailer or manufacturer - we are a service provider. The Millennium Group ensures our clients receive the equipment and services needed to maximize efficiency. If you don't need it, we won't propose it. Our unbiased service approach is a trait many offer but few deliver. When you consider our implemented industry best practices, thorough understanding of the technology, and experience designing successful print operations, The Millennium Group stands alone as an industry leader.

Unlike most print management vendors, The Millennium Group isn't a retailer or manufacturer - we are a service provider. The Millennium Group ensures our clients receive the equipment and services needed to maximize efficiency. If you don't need it, we won't propose it. Our unbiased service approach is a trait many offer but few deliver. When you consider our implemented industry best practices, thorough understanding of the technology, and experience designing successful print operations, The Millennium Group stands alone as an industry leader.

The Millennium Group has successfully optimized corporate print operations for over a quarter century. Early on, we learned that no two client engagements are alike. To ensure each partnership is successful, and forge lasting relationships, we provide each client with our complete, focused attention. The Millennium Group tours the facility, speak with the staff, and sits down with clients to discuss options. Stemming from these one-on-one meetings, a custom solution is tailored to each client's unique needs. To date, this formula for print management has proven to be successful.

optimized print services

document scanning

document distribution

cost recovery applications

web-to-print solutions

variable data printing

document workflow analysis

records / files imaging

THE MILLENNIUM  
GROUP

## Printing Sustainability

The Millennium Group keeps the environment in mind during each phase of the service process. From energy star qualified equipment to integrated green procedural initiatives, we enact our own environmental standards while striving to meet any client requirement.

Smart Print from The Millennium Group is just one way we practice sustainability. This simple, yet effective initiative is integrated into our normal operating procedures. This green initiative entails multi-up (or four-up) copy/print output. With multi-up, images are reduced by fifty (50) percent and printed side-by-side on the same page. When combining multi-up with duplex output, documents previously printed on four (4) pages are now output to one (1) page and use significantly less toner. This strategy has been embraced for standard issue documents such as forms and training guides.

## Partnership Value

- Identify opportunities
- Solve problems
- Create efficiencies
- Propose hard & soft cost savings

## Flexibility

As your business partner, we understand the need for flexibility. The Millennium Group has the ability to react to client needs with a sense of urgency and proficiency, because we designed a comprehensive account management model that allows for rapid assistance and problem solving.

## Quality

Today's fast-paced business does not allow time or budget for mistakes and low quality. The Millennium Group utilizes several auditing tools and evaluation methods to assure clients SLAs are being met and satisfaction is exceeded.
